🪪 PROFILE

I love what I do and I'm very passionate about it. I rarely settle for less and always strive to become better and improve myself. I know that the learning part never ends as the things around us are constantly evolving. Sometimes I may like to work alone, but I understand the need and the value of teamwork, of communication and knowledge sharing. I know when to pay attention and when to listen and how important is to give and receive feedback.

💼 PROFESSIONAL EXPERIENCE

Front End Developer, *Berg Software*   Sep 2019 – present
                                                                                  Oradea, Romania

🗒 COURSES

The Complete JavaScript Course 2020: Build Real Projects!, *Udemy* 🔗
- How JavaScript works behind the scenes.
- Promises, Async/Await and AJAX
- NPM, Babel and Webpack

The Complete Sass & SCSS Course: From Beginner to Advanced, *Udemy* 🔗
- Partials, Mixins
- Imports
- Media Queries
- Inheritance, Loops

Learn and Understand NodeJS, *Udemy* 🔗
- The Node Core
- Modules, Exports and Require
- Events and Event Emitter
- The Event Loop, Streams and Files
- NPM: the Node package manager

Learn Symfony 3 framework by practical examples, *Udemy* 🔗
- Bundles
- Databases and Doctrine
- Service Container
- Console Comands

The Web Developer Bootcamp, *Udemy* 🔗
Only the front end part of the course.
- Intermediate HTML, Intermediate CSS
- Bootstrap 4, Bootstrap 4: Flexbox and Layout
- DOM Manipulation
- Advanced JQuery

Java Development Module, *Scoala Informala De It* 🔗   May 2016 – Sep 2016
Oradea, Romania
- Basic HTML/CSS/JavaScript
- OOP Concepts
- Spring MVC
- Basic SQL
- Final Project - Simple CMS Web Application

⚙ PERSONAL PROJECTS

Driven by curiosity, willing become better and learn more than what I was taught in college, I spent a great deal of my free time, doing anything related to programming that came into my mind. Helping friends and colleagues, even teaching them in some cases. Constantly searching to learn more and improve myself. See on GitHub (https://github.com/space-hound 🔗).

Even though they are small projects, through them I managed to master many important concepts in programming and JavaScript. Concepts such as: hoisting, concurrency model and the event loop, inheritance and the prototype chain.

Some of my projects:
  - slots 🔗 (https://github.com/space-hound/slots)
  - ageofwar 🔗 (https://github.com/space-hound/web-ageofwar)
  - vanillaquery 🔗 (https://github.com/space-hound/web-vanillaquery)
